Ayushya Rao

Delft, Netherlands — (+43) 69010181480 — ayushya19@gmail.com

Professional Summary

XR Architect with 5+ years of experience building scalable VR, AR, simulation, and backend-integrated applications using Unity, C#, PHP, and REST APIs. Experienced in immersive enterprise training systems, real-time simulation platforms, and AI-powered XR applications. Skilled in software architecture, agile development, backend integration, and mentoring development teams.

Skills

- **Programming:** C#, PHP, Python, JavaScript, TypeScript, C++
- **Frameworks & Tools:** Unity, Unreal Engine, Laravel, Composer, PHPUnit, Django
- **Version Control:** TortoiseSVN (Subversion), Git
- **Backend & APIs:** REST APIs, Distributed Packages, Deployment Tools
- **XR & Simulation:** HTC Vive, Motion Capture Systems, Oculus Quest, MRTK2, OpenXR, Hololens 2 ,ARFoundation, SLAM, OpenCV

Professional Experience

Holoworld Pvt. Ltd. — Software Development Lead (XR, Unity, Python) Jun 2021 – Jul 2022
Mysore, India

- Led development of a large-scale Electricity Distribution Simulator using an in-house motion capture suit and HTC Vive integration, reducing maintenance-related accidents by 41%.
- Spearheaded Development of a Remote AR Training Application for sports coaching and student evaluation using Unity, Mediapipe, and TensorFlow.
- Collaborated on Military Training Simulator optimized for motion capture and real positional tracking using Lenovo Power Backpack.
- Set up local Version control system using Tortoise VPN and workflow for improved production.

Tech Mahindra — Senior Product Developer (AAA Games, Metaverse, Unity, Unreal) Oct 2022 – Present
Pune, India

- Planned and executed development of India's first Meta Bank XR experience using Unity and high security backend-integrated systems.
- Designed a Metahuman API-based facial animation pipeline with exposed REST API integration using Unreal Engine and Django.
- Built automated testing frameworks using OpenGL and OpenAI Gym.
- Published a white paper introducing a motion-video-to-3D-scene conversion pipeline reducing operational time by 80%.

Know-Center — Student Assistant (BCI Research) Feb 2025 – Present
Graz, Austria

- Worked on Brain-Computer Interface (BCI) systems and immersive analytics research.
- Developed neural signal processing and real-time visualization pipelines.

Milieu BrandMethod Pvt. Ltd. — XR Developer Aug 2019 – Jan 2021
Bengaluru, India

- Developed interactive AR marketing experiences with analytics using PHP, TypeScript, AJAX, MySQL, and Zapworks.

Education

M.Sc. Information & Computer Engineering Ongoing
Technical University of Graz, Austria
Major: Visual Computing — Minor: Brain-Computer Interaction

B.Tech. Computer & Communication Engineering 2019
Manipal University, India
